

THE ONLY WET STABLE BIOLOGICAL DUST SUPPRESSANT ON THE MARKET

Provides primary road quality with none of the bitumenous downsides

Terrabind Ultimate stabilises haul roads by creating a strong, durable surface layer while ensuring high wet stability. This minimises road wear, reduces equipment maintenance, and lowers repair requirements.

What you get from Terrabind Ultimate

**DURABLE
ROADS**

**EFFECTIVE DUST
SUPPRESSION**

**WET
STABILITY**

**IMPROVED CYCLE
TIMES**

**LESS CO₂
EMISSIONS**

**OPEX
SAVINGS**

APPLICATION AREAS

- PRIMARY HAUL ROADS WITH HIGH TRAFFIC (BUILD-IN FOR BEST WET STABILITY RESULTS)
- ROAD CONSTRUCTION AND ROAD MAINTENANCE
- UNDERGROUND MINING DUST CONTROL (SPRAY-ON)

FEATURES	DETAILS
FORM	LIQUID PRODUCT
ADAPTABILITY	PRODUCT FORMULA ADAPTABLE TO ENSURE PERFORMANCE
EFFICIENCY	HIGH DOSE EFFICIENCY
COMPATIBILITY	EXISTING MINE EQUIPMENT INCLUDING PUMPS, DOSING STATIONS AND NOZZLES
INNOVATION	IP PROTECTED PRODUCT

**Environmental
Benefits**

No crude oil
No plastics

100% biological
ingredients

Eased mine
rehabilitation

Greater
biodiversity

WITH BITUMEN BLENDS

EQUIPMENT DAMAGE AND CONTAMINATION

PRODUCT BLOCKAGES AND SEPERATION

DIFFICULT TO EXTRACT FROM THE SOIL

WITH TERRABIND ULTIMATE

NO ADVERSE EFFECTS ON EQUIPMENT

NO PRODUCT BLOCKAGES OR SEPARATION

NO EXTRACTION AFTER MINE CLOSURE REQUIRED

Turn dust into stone

“During our wet stability stress tests conducted both in the laboratory and in the field, Terrabind Ultimate exhibited outstanding stability on soil samples obtained from a mine in Paraburdoo. The rainfall levels used in these tests were significantly higher than the typical annual rainfall amounts.”
