

THE REAL DUST CONTROL ALTERNATIVE TO WATER, LIGNOSULFONATES AND SALTS

Create long-lasting dust-free roads

Terrabind Select enhances the surface layer to minimise road deterioration. Through biocementation, it forms a smooth low-friction layer, reducing road and machinery maintenance, thereby saving time and resources. It performs exceptionally well in both spray-on and build-in applications with high abrasion resistance.

What you get from Terrabind Select

**DURABLE
ROADS**

**EFFECTIVE DUST
SUPPRESSION**

**LESS CO₂
EMISSIONS**

**OPEX
SAVINGS**

**FASTER CYCLE
TIMES**

APPLICATION AREAS

- › DIRT ROADS
- › MINE ACCESS ROADS
- › PRIMARY HAUL ROADS
- › COMMUNITY GRAVEL ROADS
- › AGRICULTURAL ROADS

FEATURES	DETAILS
FORM	POWDER PRODUCT
ADAPTABILITY	PRODUCT FORMULA ADAPTABLE TO ENSURE PERFORMANCE
EFFICIENCY	HIGH DOSE EFFICIENCY
COMPATIBILITY	EXISTING MINE EQUIPMENT INCLUDING PUMPS, DOSING STATIONS AND NOZZLES
INNOVATION	IP PROTECTED PRODUCT

Environmental
Benefits

No crude oil
No plastics

100% biological
ingredients

Eased mine
rehabilitation

Greater
biodiversity

Terrabind is the only proven way to get these results*:
